

# NEW ICON SAUNA 385 Delux Ø226

## DESIGN

Cube-like design fits well to even modern gardens of today. This new design gives a better sauna experience as it has more room behind the back than a standard barrel has. Still easily assembled and movable like a barrel sauna.

## SPACIOUS & CLEVER

Icon 385 Delux is made to fit your whole family at the same time while still being compact enough. Assembly of this model can be easily done by any family and even though it is not the smallest model it still fits to most of the modern gardens of today.

## COMFORT

Due to the great 2-room design with an extra changing/relaxing room you can always take quick rests from sauna to chat with your loved ones. This extra room also helps to preserve heat loss in the sauna room and this model can be used with electric and wood burning heaters of client choice.

## WHY ICON 385 DELUX?

Our Icon 385 Delux model is made of quality Nordic spruce or Thermowood walls which gives sauna its stability and durability as well as improved safety for people with allergies (when thermowood walls model). Benches from quality Alder or Thermo-aspen.
